## SUMMARY

Software Engineer with **20 years** of experience building and operating full-stack systems end to end, from **React** and **Node.js** to **Kubernetes** operators in **Go** and high-availability distributed systems. Strong fit for senior frontend/backend or platform-heavy engineering roles that need product delivery and production ownership.

## EXPERIENCE

### Senior Software Engineer

2025 — Present

[Sirma Group JSC](#)

Joined a team building and evolving a large-scale **payment processing** platform, diving into the engineering challenges of the **Fintech** space.

### Software Engineer

2023 — 2025

[CARAUKTION AG](#)

Contributed to the creation of **AutoScout24 Direct** (acquired in 2025), enabling private sellers to auction their vehicles to a network of dealers.

Contributed across the entire flow, from the backend submission pipeline to the seller-facing listing interface, and built **CARAUKTION Direct**, a daily no-reserve auction platform for dealers.

### Software Engineer

2019 — 2023

[LeadPoint c/o Prospera Consult GmbH](#)

Worked directly with the CEO to turn early product ideas into live systems, including content platforms, admin interfaces, microservices, and APIs, while also maintaining the underlying cluster and providing production support for distributed, high-availability services.

### Freelance Developer

2013 — 2019

[Envato & Upwork](#)

Designed and developed HTML and WordPress themes for **Envato**, published a plugin on **CodeCanyon**, and delivered client projects through **Upwork**, with ownership spanning design, development, and release.

### Web Developer

2012 — 2013

[Prendit Ltd.](#)

Built a **PHP**-based platform for merchants to run online stores inside **Facebook**, and delivered websites, promotional apps, and browser games for established brands across the country.

## SKILLS

### Core

TypeScript React Node.js Go Docker  
Kubernetes GCP CI / CD AI / LLM

### Backend

PHP Java Strapi WebSockets Stripe  
Firebase Mocha Symfony Doctrine  
WordPress

### Frontend

HTML / CSS JavaScript Sass  
Tailwind CSS Vue Next.js Vite  
Electron Redux

### Data

PostgreSQL MySQL Redis BigQuery

### Infrastructure

Linux & Bash Nginx

### Design

Figma Adobe

## EDUCATION

### Bachelor in CST

2008 — 2012

[Technical University of Varna](#)

A Bachelor's degree in Computer Science and Technologies covering the full spectrum from computer architecture to software design. The program built a **rigorous foundation in algorithms, data structures, and object-oriented programming**, giving me the engineering fundamentals that every technology and stack I've worked with since has built upon.

## EXPERIENCE

### Independent Web & Game Developer

2006 — 2012

Self-employed — web & game projects

Designed, built, and operated dozens of web projects, including **flash4e.com**, which grew into steady advertising revenue, and **RumbleRace** - a browser-based game, where I handled localization, codebase maintenance, and SMS payments for the Bulgarian market.
